SUMMARY

Software Engineer with 3 years of experience building scalable web applications using **Java, Spring Boot, and React**. Strong background in frontend development with Redux Toolkit, performance optimization, and REST API integration.

EDUCATION

BE, Computer Engineering (CGPA: 8.51), 2022 — Terna Engineering College, Nerul, Navi Mumbai

Diploma, Computer Engineering (84.75%), 2019 — Swami Vivekanand Polytechnic

EXPERIENCE

XORIENT [MUMBAI, MAHARASHTRA]

Airline Turn Time Application

Software Engineer | 2023 – Present

- Worked on a React-based single-page application used to track airline ground turnaround time and operational metrics.
- Developed and enhanced UI features using React.js, Redux Toolkit, JavaScript, HTML, and CSS.
- Implemented basic performance improvements such as lazy loading and optimized state updates, contributing to ~30% improvement in page load and rendering performance.
- Integrated frontend components with REST APIs, handling data display, loading states, and standard error scenarios.
- Built reusable and responsive UI components following common frontend best practices.
- Supported deployments where the front end was hosted on AWS S3 and served via CloudFront, working with environment-specific configurations.
- Collaborated with backend and QA teams in an Agile Scrum environment, participating in sprint planning, code reviews, and demos using Git and Jira.

Swift Message Management System

Associate Software Engineer | 2022 – 2023

- Contributed to a Java and Spring Boot-based backend system for processing Swift financial messages.
- Worked on microservice components that consumed and produced messages via Apache Kafka.
- Developed and maintained Swift message parsing logic to support multiple message formats.
- Integrated backend services with databases using Spring Data JPA / Hibernate.
- Assisted with application deployments on AWS S3 using CloudFront, mainly focusing on application configuration and logs
- Supported system stability through logging, exception handling, and minor performance improvements.
- Worked as part of an Agile Scrum team, collaborating with senior engineers on feature development and maintenance.

TECHNICAL SKILLS

Technical Skills: Java, JavaScript (ES6+), Python, HTML5, CSS3, React.js, Redux Toolkit, Spring, Spring Boot, Hibernate, REST APIs, Microservices, Bootstrap, MySQL, MongoDB, MS SQL Server

Tools & Platforms: Postman, Node.js, Docker, Git, Jira, Jaspersoft, Power BI, PowerApps, MySQL Workbench,

ACHIEVEMENTS AND CERTIFICATIONS

- **AI FOR DEVELOPERS WITH GITHUB COPILOT, CURSOR AI AND CHATGPT (2025)**
